BECKENHAM & BROMLEY HISTORICAL ASSOCIATION

How to update the website

A step-by-step guide, with pictures, to adding and changing events and the words on the website.

Three things worth remembering

1. **Nothing changes on the website until you press Save changes.** You can try things out safely.
2. **You can't break anything.** Every save is kept, so an earlier version can always be put back.
3. **There's no rush.** Take your time. If something looks odd, stop and ask Mike.

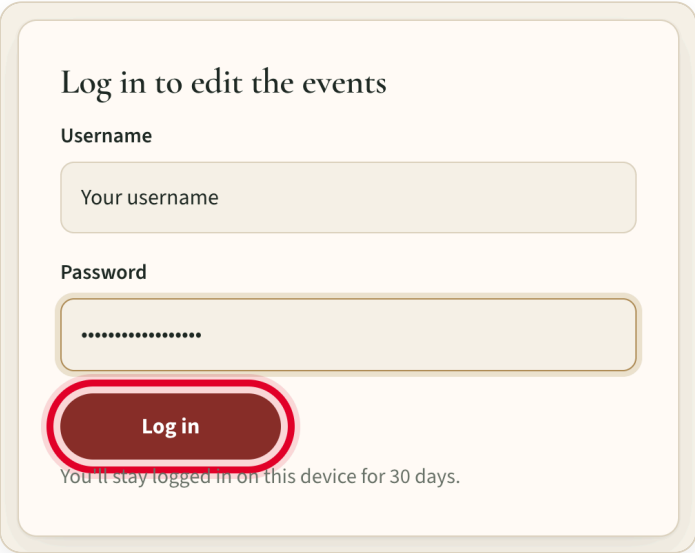

1 Getting to the editing pages

The editing pages are a private part of the website. Nobody else can see them.

1 Open your web browser (the program you use for the internet) and type this address into the bar at the very top, then press the **Enter** key (it may say **Return** or **Go**):

beckenham-historical-association.org/edit-content

2 Type your **username** and **password** into the two boxes, then click **Log in** (circled in red).

Good to know

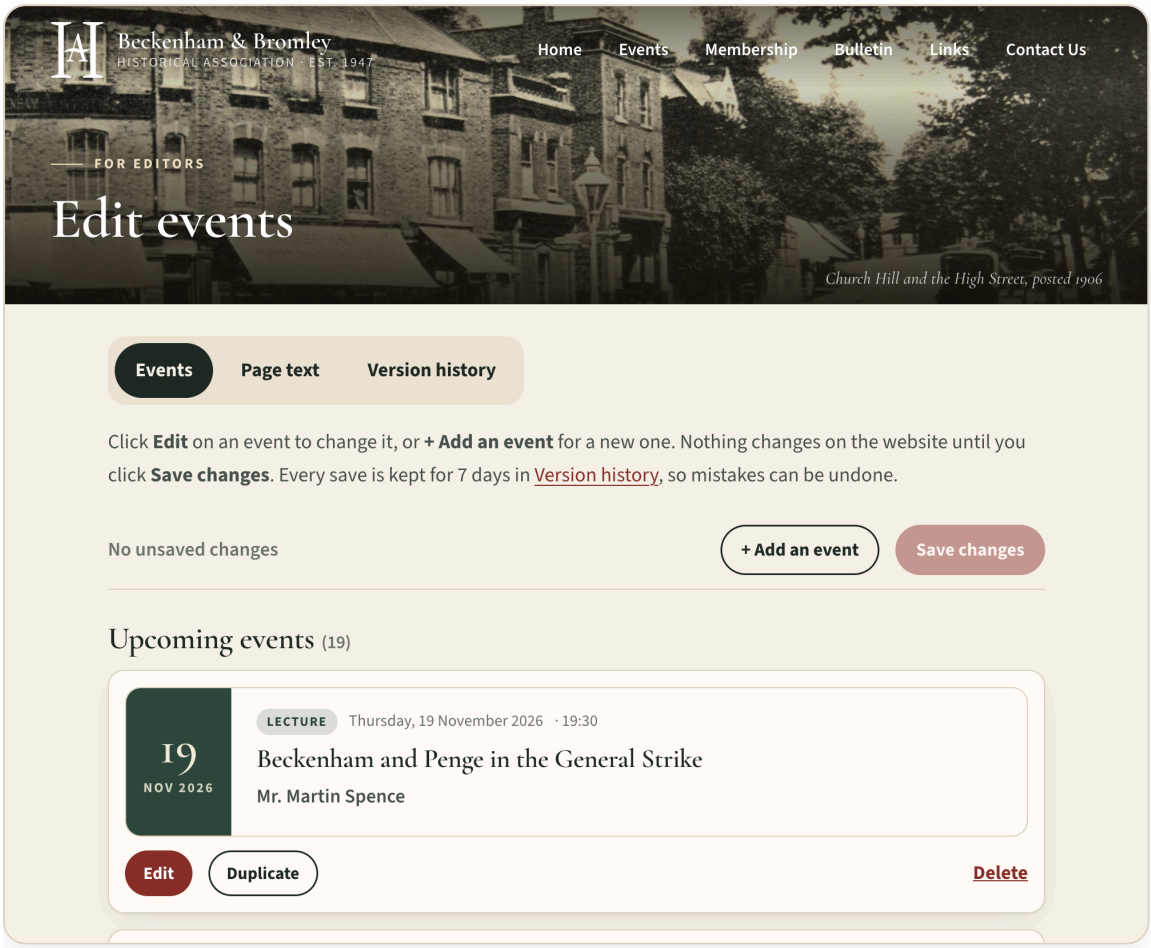

Once you've logged in, the computer remembers you for **30 days**, so you won't usually need to log in again.

My username is: .....

If you forget your password, ask Mike.

2 Finding your way around

After logging in you'll see the **Edit events** page.

The three buttons near the top

Events — add, change or remove events. This is the one you'll use most.

Page text — change the words on the other pages, such as the Home page or Contact Us.

Version history — undo a mistake by putting back an earlier version.

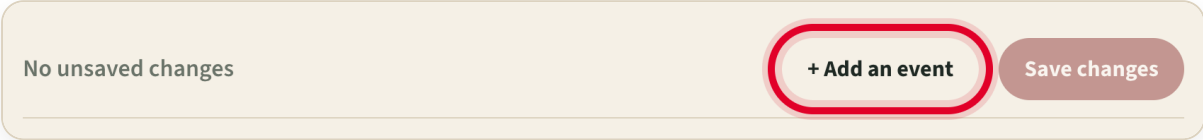

Each event is a "card"

Below, each event is shown as a card that looks just as it will on the website. Scroll down the page to see them all, in date order. Events that have already happened are tucked away at the bottom, under **Past events**.

3 Adding a new event

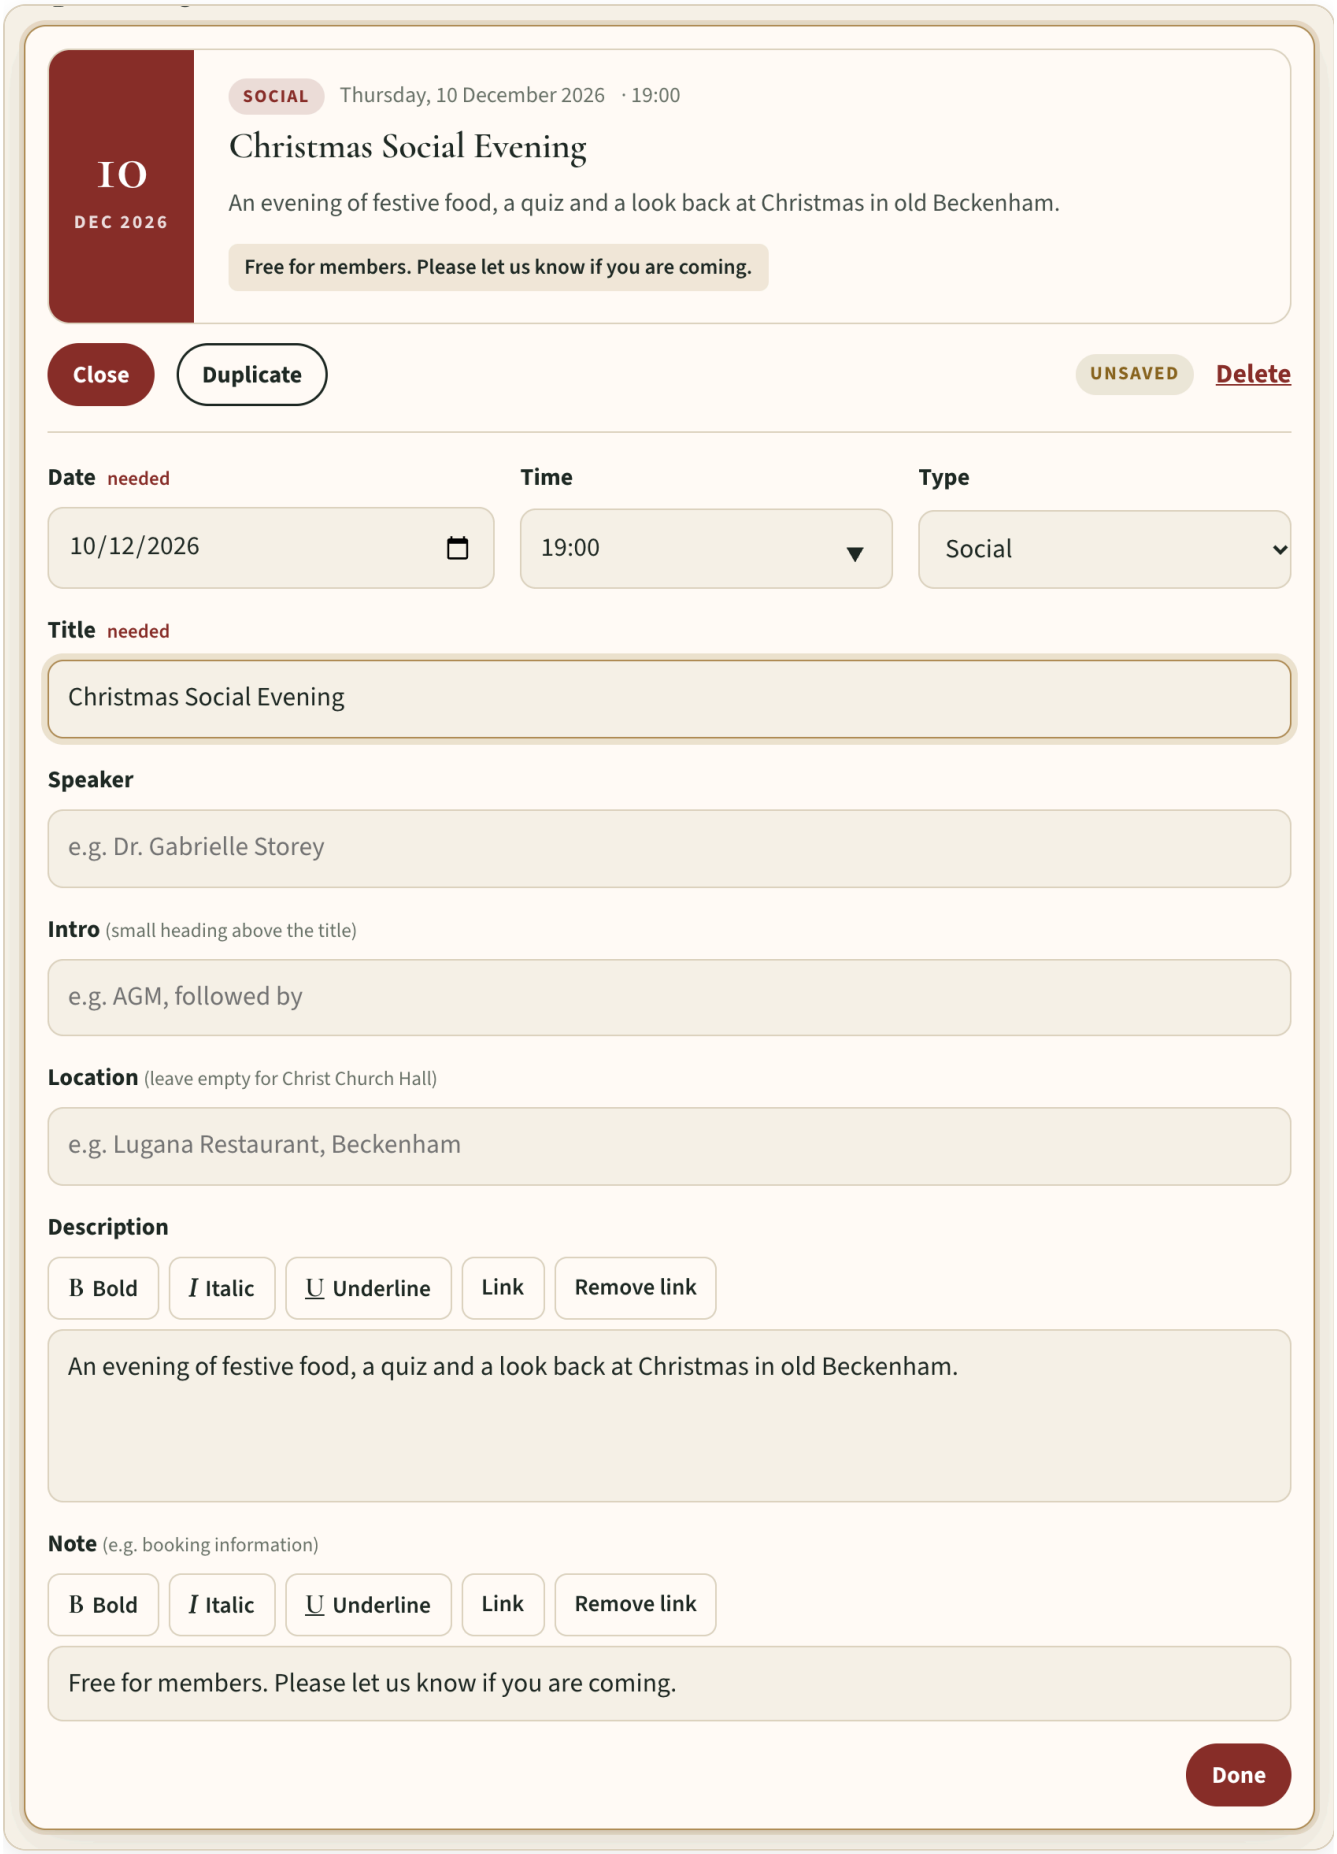

As an example, we'll add a *Christmas Social Evening* on Thursday 10 December 2026 at 7pm.

1. Click **+ Add an event** near the top of the page.

2. A new, empty card opens with boxes to fill in. Click in each box and type. Only the **Date** and **Title** are needed; leave any others empty if they don't apply.

   As you type, the top of the card shows exactly how the event will look on the website.

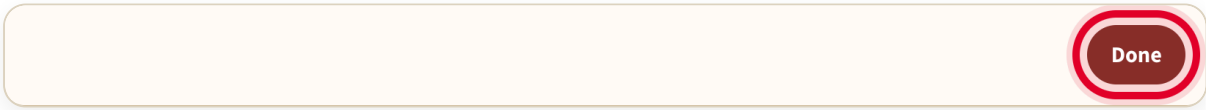

Our example, filled in. The preview at the top updates as you type.

What goes in each box

Date	Click the little calendar and choose the day, or type it as day/month/year, e.g. **10/12/2026**.
Time	Use the 24-hour clock: **19:30** for 7.30pm, **14:30** for 2.30pm. The small arrow shows the usual times.
Type	**Lecture**, **Visit** or **Social**. This sets the colour of the card.
Title	The name of the talk or event.
Speaker	e.g. *Dr. Helen Lacey*. Leave empty for visits and socials.
Intro	A small heading above the title, e.g. *AGM, followed by*. Usually left empty.
Location	Leave **empty** for Christ Church Hall. Otherwise type the place, e.g. *Lugana Restaurant, Beckenham*.
Description	A few sentences about the event (optional).
Note	Shown in a little shaded box, e.g. *Pre-booking essential.*

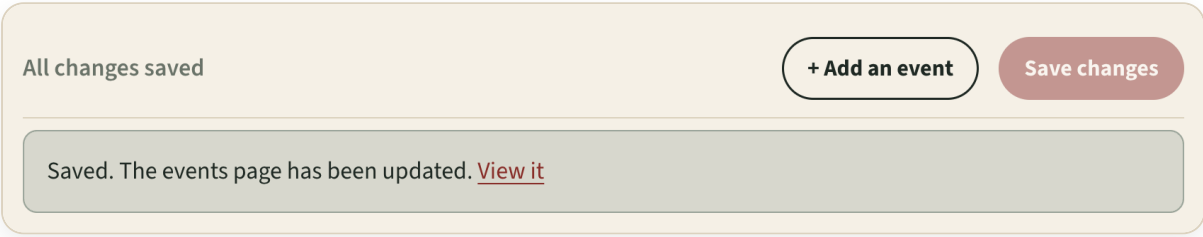

3 When you've finished, click **Done** at the bottom of the card. This just closes the boxes; it doesn't save yet.

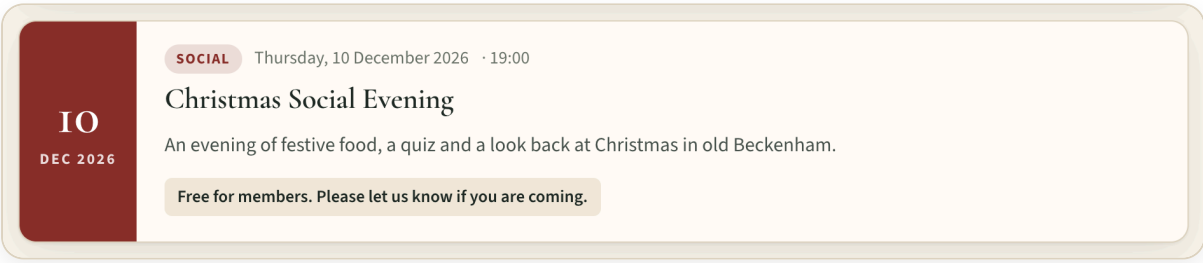

4 A **yellow box** appears at the top to remind you the change isn't on the website yet. Click **Save changes**.

5 You'll see the word **Saved**. That's it: the event is now on the website. Click **View it** if you'd like to see it.

6 Here is how our example looks on the website's Events page:

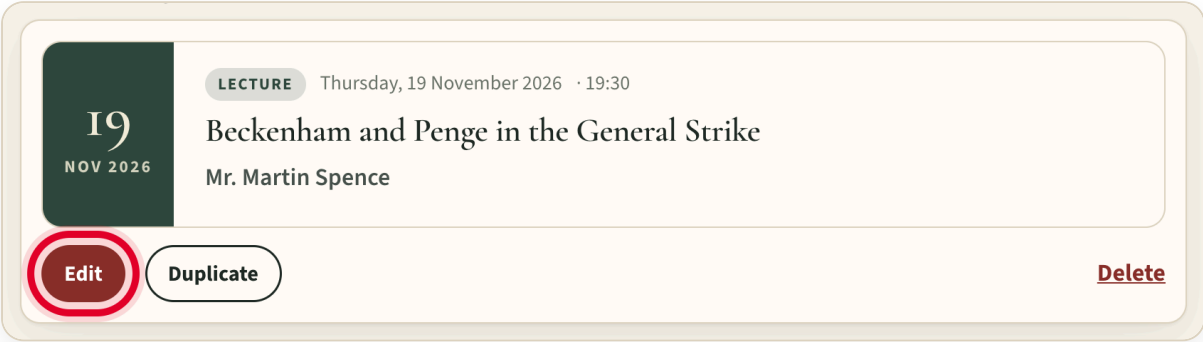

Don't forget to save!

If you close the page or go elsewhere before clicking **Save changes**, your changes will be lost. While the yellow box is showing, there's something still to save.

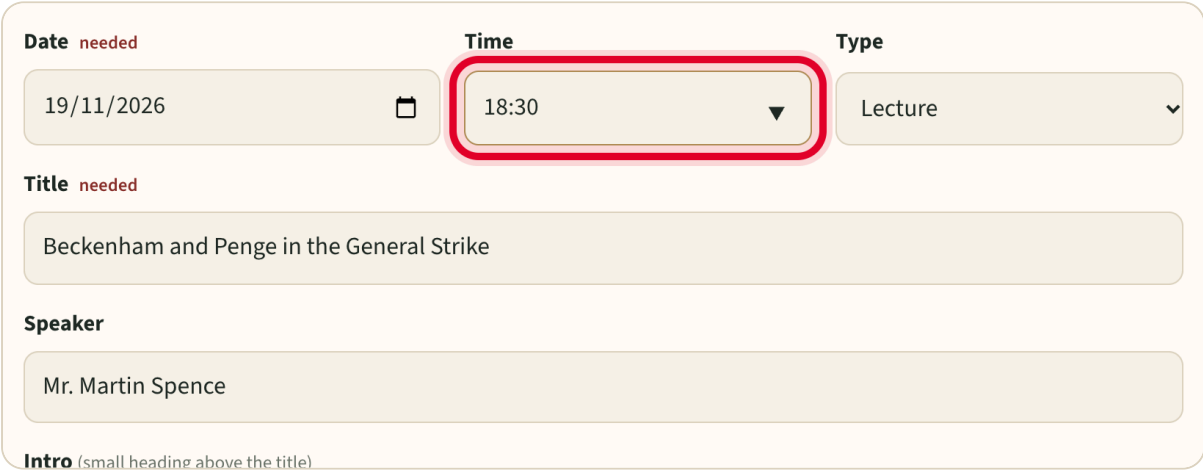

4 Changing an event

For example, if a talk's start time moves from 7.30pm to 6.30pm.

1 Scroll down to the event and click **Edit** under it.

2 The boxes open. Click in the box you want to change, delete the old words (with the **Backspace** key) and type the new ones. Here we've changed the time to **18:30**.

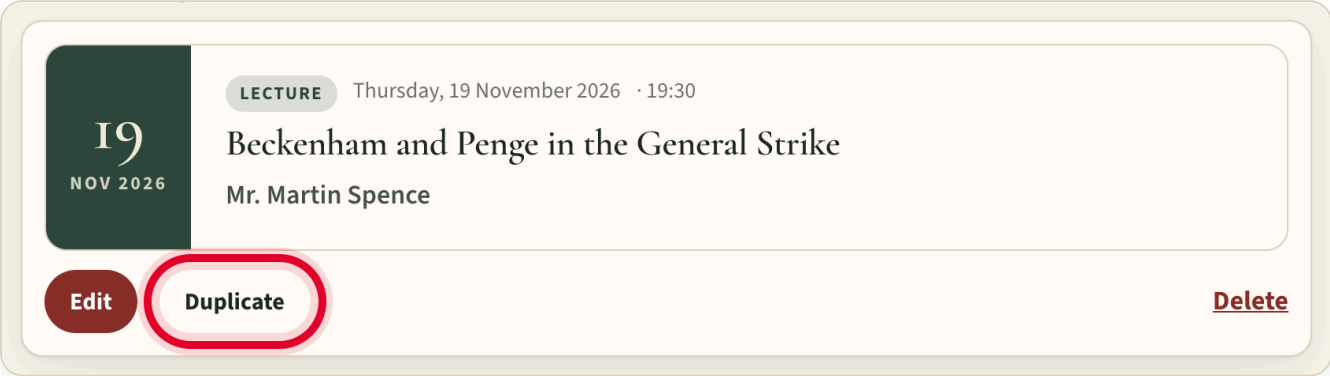

3 Click **Done**, then **Save changes** at the top, just as when adding an event.

5 Copying and removing events

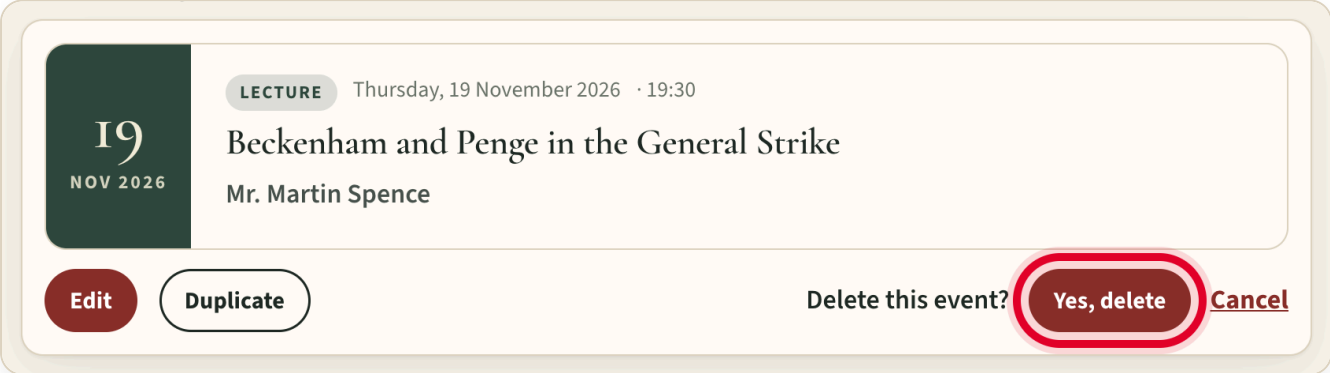

Copying an event (Duplicate)

Handy for something that happens every year, like the Annual Dinner. Click **Duplicate** under the old one and a copy appears, ready for you to change the date and any details. Then click **Done** and **Save changes**.

Removing an event (Delete)

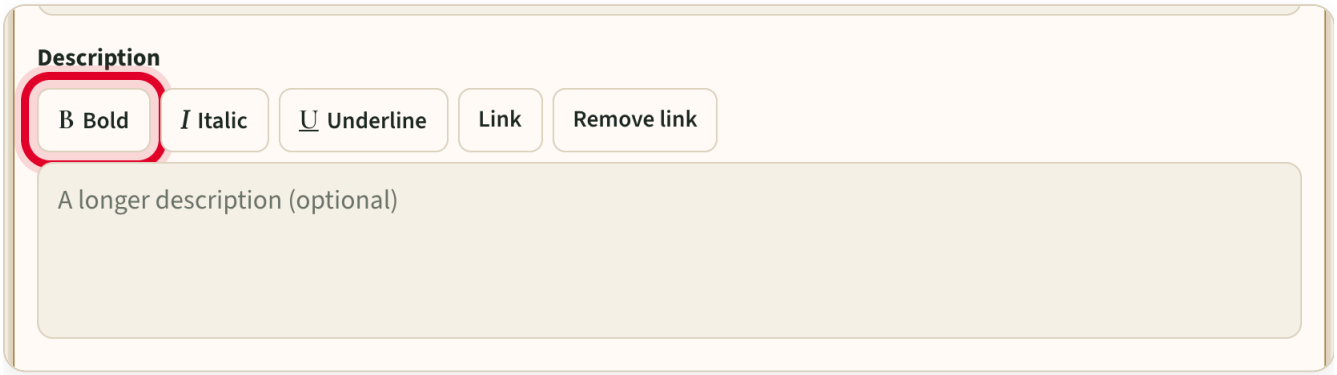

Click the red word **Delete** on the right of the card. It will ask **"Delete this event?"**. Click **Yes, delete**, or **Cancel** if you've changed your mind. Then click **Save changes**.

> There's no need to delete events once they've happened. They move to **Past events** by themselves.

6 Bold writing and links

The **Description** and **Note** boxes have some extra buttons.

To make words bold

1. Select the words: hold the mouse button down at the start of them, drag to the end, and let go. They'll be highlighted.

2. Click **B Bold**. *Italic* and Underline work the same way.

To add a link to another website

1. Select the words that should be the link, then click **Link**.

2. Type the web address (for example *www.history.org.uk*) or an email address, then click **Add link**.

To take a link off again, select the words and click **Remove link**.

7 Oops! Undoing a mistake

Before you've saved

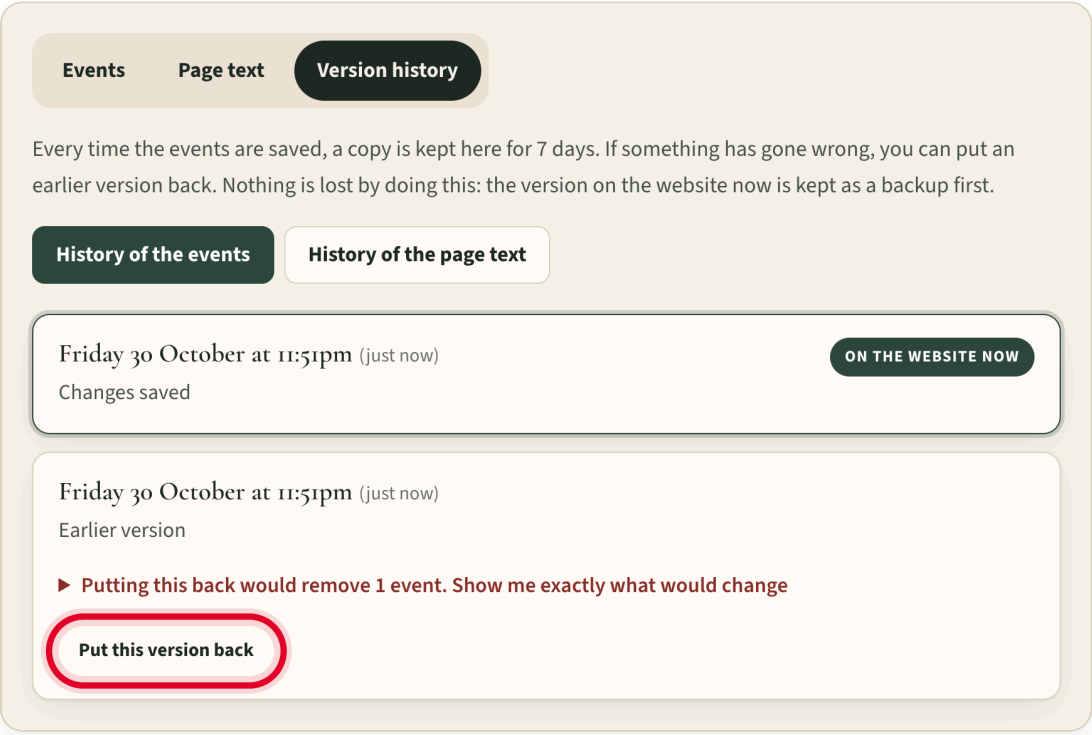

Click **Undo all changes** in the yellow box. Everything goes back to how it was when you last saved.

After you've saved

Click **Version history** at the top of the page. Every save from the last week is listed, newest first; the one marked **On the website now** is what people can see.

Find the version from before the mistake and click **Put this version back**, then **Yes, put it back**. You can click *"Show me exactly what would change"* first if you'd like to check.

Don't worry about putting back the wrong one: the version on the website is always kept too, so this can itself be undone.

8 Changing words on other pages

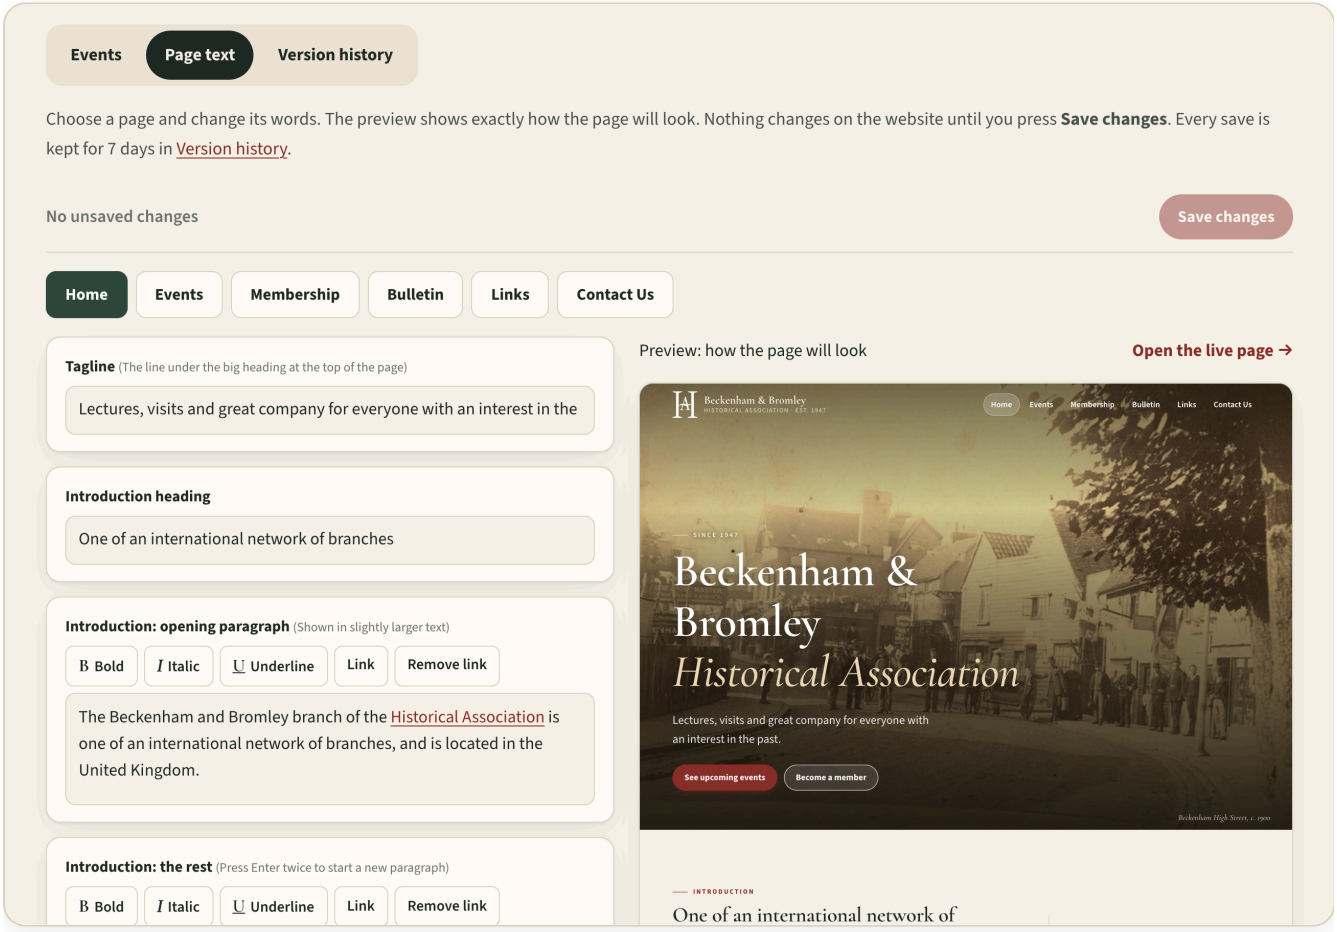

Such as the introduction on the Home page, or the names and email addresses on Contact Us.

1. Click **Page text** at the top of the editing pages.

2. Click the name of the page you want: **Home**, **Events**, **Membership**, **Bulletin**, **Links** or **Contact Us**.

3. Change the words in the boxes on the left. The picture on the right shows how the page will look.

4. Click **Save changes**.

9 If something seems wrong

"I've saved, but the website still shows the old version"

Wait a minute or two, then refresh the page (the round arrow at the top of the browser). Very occasionally it can take up to 5 minutes.

"It says I've been logged out"

Your changes are still there; don't close the page. Open a new tab, go to the editing address and log in again. Then come back to the first tab and click **Save changes**.

"An event is under Needs a look"

Something in it couldn't be understood, often the date. It isn't on the website yet. Correct it, or delete it if it isn't needed, then save.

"A box has a red message under it"

Something needs fixing before it can be saved, for example a missing date or title. The message says what.

"I'm not sure what I've done"

If you haven't saved, click **Undo all changes**. If you have, use **Version history** (section 7). Or just stop and ask Mike. Nothing is ever lost.

The editing address again
